10 " "

*** Extremely rare. Amongst the woodcuts are exhibited some curious representations of Milan Cathedral, which Mr. J. S. Hawkins considered so important, as being the earliest Engraving of Gothic Architecture known, that he determined to re-engrave them in facsimile, but hearing they formed part of Cesariano's translation he contented himself with giving copies on a reduced scale in his History of Gothic Architecture. For a long time Mr. Hawkins was unable to obtain even a sight of the work, but finally procured a copy of a volume, described by him as "so scarce that I at present know of no more than two copies, besides my own, existing in this country, and one of these two is in the Bodleian Library." Some of the other woodcuts are most interesting, and include an ancient Sundial, antique Baths, the Sphere, a Ship moved by Paddles and and various motive Powers, Architectural Instruments, &c. The Commentary is extremely valuable, not only to the Mathematician and Architect, but also to the Painter and Sculptor, as it gives rules for colouring and for studying symmetry of proportion, specially mentioning Michael Angelo and other eminent Artists. The first mention of the Camera obscura, usually attributed to Porta, is also found therein. For the History of Art and Literature, Cesariano's notices are highly important, as nearly every page has allusions to, and mention of names of men eminent in every branch of science.
